

We're expanding our **gene pool**

Biopharmaceutical Careers, Waterford.

It takes a broad mix of biopharmaceutical experts to improve the lives of patients suffering from life-threatening diseases. It takes commitment to develop and apply the most advanced life-science technologies and to become a confident world leader in the field. Genzyme is a diversified enterprise of over 12,000 employees globally, many of whom have helped us introduce a diverse range of life-saving breakthrough medical treatments. The company's products and services are focused on areas such as rare inherited disorders, kidney disease, cancer, transplant and immune disease.

Innovation and commitment are key to our success, our dedicated teams are at the heart of our enterprise and with 2009 revenues of \$4.5 billion, Genzyme continues to expand its global operation.

By joining Genzyme Waterford you will be exposed to a range of innovative technologies. With a total site investment to date of €400m, this is an exciting opportunity to benefit from the experience and development opportunities offered by a company which is truly going from strength to strength.

Genzyme's facility in Waterford is a key site within corporate operations and encompasses everything from Oral Dose Manufacturing to Biologics Fill/Finish as well as finished product Packaging and Distribution. As we continue to grow, we are looking for the right people to help us develop and deliver our highly effective therapies to support the patients we serve. We are looking for pioneering individuals who will bring a wealth of experience and fresh ideas and, in return, you will enjoy personal and professional development and have the potential to improve hundreds of thousands of lives.

We currently have a range of opportunities available in the following areas:

- **LEADERSHIP POSITIONS**
Manufacturing, Supply Chain, Quality
- **ENGINEERING & TECHNICAL POSITIONS**
Process Manufacturing, Automation, Validation, Development Scientist
- **QUALITY, MANUFACTURING & SUPPLY CHAIN**
QC Laboratories (Micro & Chemistry), Quality Assurance, Manufacturing, Logistics
